

# CND® SAVINGS

JANUARY/FEBRUARY 2011

CND®  
Hands. Feet. Beauty.

## SPOTLIGHT

# THE TIPPING POINT

Not all natural nails are created equal, so that's why CND has four different tip options - Performance, Velocity™, Eclipse™ and Formation™ - to truly customise your enhancement services and ensure you get the perfect fit every time.

### PERFORMANCE TIPS

Our thinnest tip, with a deep "C" curve and natural upper arch. No contact area requires minimal blending and allows easy placement on healthy nails with a slight extension edge.

### VELOCITY TIPS

Our most dramatic upper arch, with a deep "C" curve. Micro contact area allows for fast blending on healthy nails with a slight free edge.

### ECLIPSE TIPS

A square "C" curve, dramatic upper arch and winged contact area makes this the perfect tips for nails with deep sidewalls.

### FORMATION TIPS

Our most versatile tip. Gentle "C" curve, a dramatic lower arch and full contact area conforms to most nail shapes.

## HOT DEAL!

## LIMITED EDITION!

# THE LOOK ENAMEL COLLECTION

**THE MOOD:** After hours. Lights out. Not a shard of moonlight, or a quiver of neon fractures the solid wall of night. Across the darkness, circuits spark and flare. There's a blue-green dazzle on midnight asphalt - a slick of iridescent oil, the shimmer of shattered glass under a street lamp.

### THE LOOK ENAMEL COLLECTION

1 x **NEW** Urban Oasis Colour

1 x **NEW** Teal Sparkle Effect

**ONLY \$24.95!**

SPOTLIGHT

# FASTER. THINNER. STRONGER.

CND tips can reshape the look of the natural nail, creating the illusion of a consistently beautiful, elongated and sleek silhouette. They can correct misshapen or bitten nails, as well as enhance any nail requiring lengthening or redesign.

CND tips are carefully engineered with refined shapes and high-grade proprietary ABS plastic for built-in strength points that help prevent cracking and splitting, ensuring long-term wear.

## CND PERFORMANCE, VELOCITY™, ECLIPSE™ AND FORMATION™ TIPS ALL SHARE THESE IMPORTANT ATTRIBUTES:

- **Fast and easy refinement** – tapered extension and thinner shape reduce preparation time for overlay application.
- **Protection from cracks and breakage** – reinforced stress areas along the sidewall and free edge provide added protection under impact.
- **Snug fit** – thin contact area closely conforms to the natural nail surface.
- **Proper alignment** – deep stop-point encases the natural nail edge, ensuring correct alignment of the tip with the nail and finger.
- **Multiple options** – new matte finish, a selection of shapes, colours and sizes meet each client's unique needs and allows the nail professional to provide a truly custom service.

# WINNING STYLE

CND Nail Style Competition winner Anna Nelson created this golden oilslick nail style, as seen in the 2010 Fall/Winter Look Book.

Anna's unique drip technique involves meticulously layering CND Colour & Effects to create dimension and texture on the nail. So, with a little bit of patience and a very steady hand, follow our steps below and create your own masterpiece. Just remember to practice meticulous P.R.E.P. before starting!

- STEP 1**  
Polish a base layer of Gold Chrome.
- STEP 2**  
Using Blackjack, randomly draw black leopard-like spots on the nail.
- STEP 3**  
Fill in the black spots with Gold Chrome, leaving a thin outer rim of black.
- STEP 4**  
Fill in the gold spots with Copper Chrome leaving a thin outer rim of gold and black.
- STEP 5**  
Fill in the copper spots with another layer of Blackjack, leaving a thin outer rim of copper, gold and black.

Allow polish to completely dry and finish with Speedy Top Coat, and a spritz of SolarSpeed Spray® for a thorough, top-to-bottom set.
